

JASON BROWN

INTRO

Headline: General Nephrology | Patient Assessment and Diagnosis | Evidence-Based Treatment | Continuum of Care | Patient Safety | Treatment Plan Development and Execution

Country/Region: Kentucky, USA
Zip code: 41074
Industry: Hospital & Health Care

ABOUT

I am a highly committed and compassionate healthcare practitioner, equipped with hands-on nephrology practice; backed by proven expertise in driving excellent patient experience and health outcomes. Currently, I am in the pursuit for opportunities to further hone and apply the skills I acquired through fellowship, residency, and clinical rotations across diverse clinical settings. Along with the knowledge and experience gained by completing medical degrees, workshops, and trainings, as well as by working as an adult hospitalist. In addition, I am competent at conducting patient diagnosis; providing evidence-based treatment; and creating and executing patient-specific care plans to ensure continuum of care.

My solid communication and interpersonal abilities enabled me to collaborate with other primary care providers, physicians, specialists, and community-based and other healthcare organizations. These efforts have aided in fostering a patient-centered environment; delivering top-quality nephrology services; and achieving healthcare goals and objectives.

EXPERIENCE

Title: Chief Fellow, Nephrology Fellowship

Company: ABC University

Location: Cincinnati, OH, USA

I am currently working in this role [checkbox]

Start Date: Aug 2021

Description:

PROJECTS

Project name: Renasight Genetics Study

I am currently working on this project [checkbox]

Description:

- Execution of a research on biomarkers associated with the phenotype of chronic kidney disease, including evaluation of the genetic predisposition of chronic kidney disease in a real-world practice setting

Project name: The effects of reduced adrenal cortical hormones on blood pressure development in rats

Description:

- Investigation of the effect of a reduction (rather than an elimination) of these hormones and hypertension development

Project name: Interventional and educational program in diabetic patients

Description:

- Facilitation of study to effectively control blood sugar levels in diabetic patients and prevent its complications, which entailed pre- and post-interventional analyses

Project name: Problem-solving for better health

Description:

- Participation in a workshop focused on optimization of resources, prioritization of people's well-being, attainment of excellent and a measurable impact at all levels of care, and resolution of health problems in broad developmental context

Project name: Diet survey

Description:

- Study of dietary habits, calorie intake, and nutritional deficits of people in an underprivileged area
- Provision of dietary recommendations regarding nutritional requirements for optimal health

Project name: Fieldwork in Department of Community Medicine

Description:

- Key inputs in epidemiological case studies of communicable diseases, health surveys, and imparting health education

HONORS & AWARDS

Title: Winner, Shark Tank Nephrology Competition – Team Bloomington

Issuer: Nephrology Business Leadership University

Year: 2021

Title: Nominee, Catherine McAuley Physician Leadership Award

Issuer: Mercy Hospital Jefferson

Year: 2019

Title: 10th Percentile in the Country

Issuer: American Boards of Internal Medicine

Year: 2013
