

CLIENT'S NAME

 TORRANCE, CALIFORNIA 123456 |  123.456.7890  RESUMEWRITERS@GMAIL.COM

DATA ANALYST

QUALIFICATIONS PROFILE

Analytical, goal-focused, and multifaceted professional, offering hands-on experience in data modeling, machine learning, simulation, and predictive modeling

Capable of applying skills in advanced statistical and data mining techniques; complemented with proven experience in using statistical computing languages R, Python, and Spark to clean and examine large datasets. Adept at developing processes and tools to monitor and analyze model performance and data accuracy. Equipped d with exceptional communication, organizational leadership, and interpersonal aptitudes in building rapport with diverse individuals; bilingual in English and Ethiopian languages.

CORE COMPETENCIES

Data Mining | Data Manipulating | Machine Learning | Deep Learning | Data Visualization | Quality Assurance Reporting and Analytics | Process Improvement | Vendor Management | Requirement Gathering and Analysis

PROFESSIONAL EXPERIENCE

COMPANY'S NAME, TORRANCE, CA

Data Scientist/Analyst

Jul 2018–Present

- Conceptualize sentiment analysis model aim to improve sales and marketing strategies
- Demonstrate strong command in utilizing Python and Spark to clean and examine large datasets
- Perform cluster analysis to generate segmented profiles of customers, and formulate critical insights through techniques, such as data mining and advanced algorithms
- Design predictive model using flexible and analytical approach for extraction of optimal value from data using advanced algorithms
- Display competency in extracting actionable business insights through machine learning analysis on structured and unstructured data
- Closely track research projects to ensure alignment with resources and timelines
- Provide guidance regarding BI processes, practices, and technologies to support business management and optimization
- Take charge of creating and evaluating data visualization and reporting dashboards
- Aid teams by turning data into critical information used to drive sound business decisions
- **Created advanced mathematical and statistical techniques to determine patterns and identify opportunities, while boosting business outcomes**
- **Significantly enhanced work by designing and implementing machine learning solutions**
- **Efficiently administer data science work through high-level of knowledge in statistics, mathematics, and computer science**
- **Streamlined data science processes with better storage, integration, and reporting**

COMPANY'S NAME, TORRANCE, CA

Data Scientist Internship

Feb 2018–June 2018

- Conducted data processing using Python libraries, such as NumPy and Pandas
- Executed data warehousing for data profiling to assess the data available in an existing database
- Determined and formulated critical insights through techniques, such as data mining and advanced algorithms

CLIENT'S NAME

 TORRANCE, CALIFORNIA 123456 |  123.456.7890 |  RESUMEWRITERS@GMAIL.COM

- **Enhanced the performance of queries with modifications in PostgreSQL queries by removing unnecessary columns and eliminating redundant and inconsistent data**

COMPANY'S NAME, TORRANCE, CA

Data Analyst

Nov 2014–Dec 2016

- Exemplified skills in identifying markets ready for penetration and boosting existing sales with analysis of changing user and industry conditions
- Keenly evaluated data and determine patterns, meaningful relationships, anomalies, and trends
- Gathered business intelligence data from available industry reports, public information, field reports, and purchased sources
- Assessed competitive market, factoring in related products, markets and share changes
- Guided frontline teams in creating data-driven decisions based on current and relevant insights
- **Devised and modified dashboards to closely monitor progress of key performance indicators (KPIs), while administering output and dashboards to document key business intelligence**
- **Decreased irrelevancies by filtering and cleaning data with automated and manual data reviews**

ADDITIONAL EXPERIENCE

COMPANY'S NAME, TORRANCE, CA

Tutor/Volunteer

Dec 2016–Jan 2018

- Provided lecture on SQL and python programming languages
- Managed data migration from desktop application to cloud-based application

EDUCATION

Master's Degree, Aug 2021

University Name, Torrance, CA

Bachelor's Degree, 2005

University Name, Torrance, CA

ACTIVITIES

Ethiopian Muslim Association of Seattle, *Board Member* (Sep 2019–Present)

TECHNICAL SKILLS

Python | Basic C++ | R | NPL | SQL | Advanced Excel | Power BI | Tableau | Version Control Git | GitHub | Cloud Computing | AWS | Window | Mac | Linux
