PROFESSIONAL EXPERIENCE

COMPANY NAME | LOCATION

Java Full Stack Developer:

07/2024–09/2024

- Created dynamic user interfaces with HTML, CSS, JavaScript, and React
- Developed and managed server-side logic, databases, and APIs using Java, Spring Boot, and Hibernate
- Utilized RESTful APIs to facilitate smooth communication between front-end and back-end systems
- Troubleshoot and debugged applications to enhance performance and user experience
- Coordinated with team members in maintaining codebases and branches using Git

PROJECTS

2024

Livestock Medical Record Management System
Role: Frontend Developer
Company/Client Name: Revature
Software Used: AWS RDS, Junit, Mockito, Spring Framework, Git, React, TypeScript, and REST
Overview/Objective: Development of a software solution aimed at optimizing veterinary practices that specialize in livestock care

- Designed the frontend with React, emphasizing the creation of modular components to improve user experience
- Executed backend functionalities using Spring Boot, following coding and architectural best practices

2024

E-Commerce “Celestial Emporium”
Role: Backend Developer
Company/Client Name: Revature
Software Used: Spring Framework, PostgreSQL, AWS RDS, Git, React, HTML, CSS, TypeScript
Overview/Objective: Implementation of a direct marketplace enabling player characters in a D&D game to trade items for gold

- Utilized Spring Boot to simplify the development of backend features for managing user profiles, items, and inventories
- Employed Axios to retrieve and display data, such as user profiles, seller inventories, and items
